

QTronic hires Software Developers in Cluj

QTronic GmbH, based in Berlin, is looking for software developers for its Cluj office. QTronic offers tools and engineering services for the simulation, analysis and automatic testing of complex systems in the automotive industry. With the help of our software tools, engineers at AMG, BMW, Mercedes-Benz, Volvo Car Corporation, VW and others can identify design problems faster and with much lower costs than otherwise possible. For more details please visit the www.qtronic.de site.

Our business unit located in Cluj is responsible for the development of the QTronic flagship tools Silver and TestWeaver, but also of other advanced tools for engineering data analysis, visualization and management. Our team is dealing with the entire software product life cycle: from requirement analysis, design, implementation and testing, to documentation, support, continuous build and deployment.

You will be responsible for a new development project: a software tool for the *visualization and management of vehicle configuration and tuning parameters*. The work will involve the design and implementation of a desktop application which:

- imports and exports parameter data with various formats
- helps to explore the differences between several parametrization versions
- offers data visualization and manipulation capabilities with tables and various widgets, including 2D and 3D diagrams
- has a configurable graphical user interface geared towards usability and performance

We are looking for people who:

- have good experience with Java and Object-Oriented design, at least 3 years
- are familiar with GUI programming in Java using one or more of Swing/SWT/JavaFx
- can reason critically about software design
- favor thorough understanding over empirical approaches
- are driven by enthusiasm and work ethic rather than supervision
- pay attention to details (and we mean it!)

We offer:

- interesting challenges and many new things to learn
- interaction with an international team
- flexible working hours
- no-nonsense, relaxed work environment
- cozy office in the Cluj downtown
- good salary

Interested? Send a CV and a cover letter to jobs@qtronic.de or call Horea Haitonic for details: +40 744 490 835
